DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/24/06 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 26-33, and 44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added limitations of "...wherein the patient lacks the ability to maintain an acceptable blood glucose level without medical treatment..." amended 4/1/05 and in the claims 26, and 32 lacks support in the specification. In claim 44, "...a volume of 200-400 ml and wherein the specific breathing maneuver comprise inhaling the 200-400 ml of air entrained with insulin lacks support in the specification. In claims 26 and also in claim 32, (d) "...a total

inhaled volume of 65% to 100% of lung capacity..." the specification provides support for the total lung volume or high volume not "the total inhaled volume" as claimed. The above limitations constitute new matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 34-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 34, the limitations of "...inhaling the insulin and air cloud, followed by continual inhalation with additional air until a determined point of inspiration is reached; wherein when the above steps are repeated in order to administer subsequent doses of insulin substantially the same total volume is inhaled during each repetition of the inhaling step by inhaling to substantially the same determined point during each repetition..." it is unclear as to what is the determined point of inspiration and how the same total volume is inhaled during each repeated dose as many factors in breathing capacity of a user would determine the dose being received.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the

Art Unit: 3771

reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26 and 32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 respectively of U.S.

Patent No. 7,021,309. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of claims 26 and 32 are more specific and therefore "anticipates" patented claim 1. *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (FED. Cir. 1993).

Response to Arguments

Applicant's arguments with respect to claims 26-31 have been considered but are moot in view of the new ground(s) of rejection.
